

To Whom It May Concern:

I respectfully urge you to reject NAB petition 04-160. I enjoy the entertainment and service provided by XM radio.

I understand that the NAB is concerned over content being offered by XM radio.

I pay for XM radio and feel that the National Association of Broadcasters has no say over XM. If the NAB members had done a better job meeting the needs of consumers like me they would not be feeling the current decline in their market. Local stations, members of the NAB, are the people who lost their market. They should not complain to the FAA to get them back.

On Satellite radio, I get to listen to what I want to, when I want to. Local stations play the music they pick, have excessive commercials, and incessant talking by DJ who feel compelled to try and act funny-many times vulgar. I for one am happy to pay for better service.

The NAB made their own bed. Let free enterprise take its course. Let the consumer pick their own direction without government interference.
